Question 1

Correct

Mark 1.00 out of 1.00

```
let r = express.Router()
```

The above statement is used for:

- Select one:
- ☒ a. create a new router object ✓
  - ☐ b. return the number of connected clients
  - ☐ c. enable the routing functionality in Express.js
  - ☐ d. create a new Express object
  - ☐ e. return the machine routing table

Your answer is correct.

The correct answer is: create a new router object

Question **2**

Correct

Mark 1.00 out of 1.00

Assume you have this fragment of code

```
app.get('/book/:bookId', function (req, res) {  
  // print out the book id  
})
```

and the client sends this request:

```
http://localhost:8080/book/45
```

Which statement prints the value of the **id** to the console?

Select one:

- ☐ a. console.log(req.url.bookId)
- ☒ b. console.log(req.params.bookId) ✓
- ☐ c. console.log(req.bookId)
- ☐ d. console.log(req.params.BookId)
- ☐ e. console.log(res.params.bookId)

Your answer is correct.

The correct answer is: console.log(req.params.bookId)

Question **3**

Correct

Mark 1.00 out of 1.00

Assume you have this fragment of code:

```
app.get('/task(Monash)?FIT', function(req, res){  
  res.send('We found a match');  
})
```

This route path will match:

Select one:

- ☐ a. /MonashFIT and /TaskFIT
- ☒ b. /taskMonashFIT and /taskFIT ✓
- ☐ c. /taskMonash only
- ☐ d. any path with /task as prefix and fit as sufux

Your answer is correct.

The correct answer is: /taskMonashFIT and /taskFIT

Question **4**

Correct

Mark 1.00 out of 1.00

Express.js is

Select one:

- ☒ a. a web application framework for Node.js ✓
- ☐ b. an external function
- ☐ c. a built-in module
- ☐ d. a built-in web application framework for Node.js
- ☐ e. a high-level Python Web framework

Your answer is correct.

The correct answer is: a web application framework for Node.js

Question **5**

Correct

Mark 1.00 out of 1.00

Assume you have this fragment of code:

```
app.get('/delete/:userId2Delete', function (req, res) {  
  console.log(req.params);  
})
```

The data type of req.params is:

Select one:

- ☒ a. object ✓
- ☐ b. string
- ☐ c. number
- ☐ d. undefined
- ☐ e. array

Your answer is correct.

The correct answer is: object

## Question 6

Correct

Mark 1.00 out of 1.00

Assume you have this fragment of code:

```
app.get(/FIT/, function(req, res){  
    res.send('We foud a match')  
})
```

This route will match:

Select one:

- ☒ a. any path with **FIT** in it ✓
- ☐ b. any path that does not have **FIT** in it
- ☐ c. any path that starts with **FIT**
- ☐ d. path /FIT only
- ☐ e. none of the above

Your answer is correct.

The correct answer is: any path with **FIT** in it

## Question 7

Correct

Mark 1.00 out of 1.00

In order to use Express.js in an application, module 'http' should be imported first.

Select one:

- ☒ a. False ✓
- ☐ b. True, module 'url' should also be imported.
- ☐ c. False, module 'url' should be imported first.
- ☐ d. True

Your answer is correct.

The correct answer is: False

## Question 8

Correct

Mark 1.00 out of 1.00

Which of the following is false about Express.js?

Select one:

- ☐ a. Express uses a different language
- ☐ b. Express handles I/O request
- ☐ c. Use third-party middleware to add functionality to Express apps
- ☐ d. Express reduces the performance of Node.js dramatically
- ☒ e. If you think more than one of the above are false, select this option ✓

Your answer is correct.

The correct answer is: If you think more than one of the above are false, select this option

## Question 9

Correct

Mark 1.00 out of 1.00

In order to accept requests with a path that starts with **BI**, ends with **DX**, and zero or more characters in between, we have to use:

Select one:

☐ a.

```
app.get('/BI+DX', function(req, res){  
  //Your loginc  
})
```

☐ b.

```
app.get('/BI?DX', function(req, res){  
  //Your loginc  
})
```

☐ c.

```
app.get('/BIDX/', function(req, res){  
  //Your loginc  
})
```

☐ d.

```
app.get('/', function(req, res){  
  //Your loginc  
})
```

☒ e.

```
app.get('/BI*DX', function(req, res){  
  //Your loginc  
})
```

☐ f.

```
app.get('/BIXDX', function(req, res){  
  //Your loginc  
})
```

Your answer is correct.

The correct answer is:

```
app.get('/BI*DX', function(req, res){  
  //Your loginc  
})
```

Question **10**  
Correct  
Mark 1.00 out of 1.00

- Express.js
- is not scalable
  - is the only way to handle I/O requests in Node.js

True or False??

Select one:

- ☐ a. True, False
- ☐ b. True,True
- ☐ c. False,True
- ☒ d. False, False ✓

Your answer is correct.  
The correct answer is: False, False
