

# FIT2095

## e-Business software technologies

- Week 3 - Workshop Quiz
- 2 Questions

# Question 1 (12) marks

**Assume you have a new project, list all the required steps or commands to include Express.js in your project?**

# Question 2 (25) marks

Using Node.js , develop a web application that uses Express.js to return the result of two arithmetic operations **add** and **sub**.

**URL Syntax:** <http://address:port/math/operation/operand1/operand2>

- Operations and operands need to be sent via the url
- “Unknow Operation” is the output for anything else
- Example:
  - <http://localhost:8080/math/add/5/2>
  - <http://localhost:8080/math/sub/3/12>
  -
