FIT2095 e-Business software technologies S2 2019

Dashboard / My units / FIT2095_S2_2019 / Week 3 (12 Aug - 18 Aug) / Week 3: Workshop Quiz

Started on	Friday, 16 August 2019, 12:31 PM
State	Finished
Completed on	Friday, 16 August 2019, 1:00 PM
Time taken	28 mins 31 secs
Grade	**8.11** out of 10.00 (**81**%)

Print friendly format

Question **1**	Question 1
Complete	
Mark 8.11 out of 10.00	

1. First access that project folder via terminal
2. Initialize npm once that project folder has been accessed: init npm
3. Install express for that project folder: npm install express
4. create the js file in the project folder for writing the code for the express application.
5. Import the express module: let express = require('express');
6. In that js file, create an instance of the express application by: let app = express();
7. Create different handlers for handling different pathnames. Example (For root route):

app.get('/', function(req, res){

//the code for the functionality that we want to achieve when the user send the root route path request

res.send(//the results of that functionality will go here);

})

app.listen(8080);

Question 2

```
let express = require('express'); //importing the express module
let app = express(); //creating an instance of the express application

app.get('/math/add/:operand1/:operand2', function(req, res) {

let operand1 = parseInt(req.params.operand1);
let operand2 = parseInt(req.params.operand2);

let result = operand1 + operand2;
res.send("Output:" + result);

})

app.get('/math/sub/:operand1/:operand2', function(req, res) {

let operand1 = parseInt(req.params.operand1);
let operand2 = parseInt(req.params.operand2);

let result = operand1 - operand2;
res.send("Output :" + result);

})

app.listen(8080);
```
